

7 x 7 Galvanised

6x7 construction general purpose wire rope is available with either FC (fibre core) or WSC (wire strand core). When supplied with a WSC the rope is more commonly referred to as 7x7. The rope is very popular in smaller diameters from 0.5mm to 2mm where the cable remains very flexible. 6x7 ropes become quite rigid in the larger diameters and are often considered stiff in diameters 6mm and above. In these diameters they tend to be used for applications where the rope is static/not working. A typical example being a mast stay. 7x7 construction is readily available in both galvanised and marine grade stainless steel.

- Small diameter wire rope slings
- Stay Wires
- Fencing Rope
- General Engineering Applications
- Standing Rigging
- Garage Door Wires
- Hanging Signs

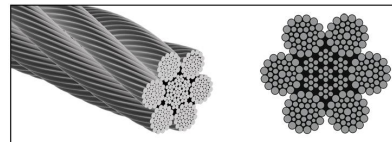

7 x 19 Galvanised

6x19 construction wire rope is available with either FC (fibre core) or WSC (wire strand core). When supplied with a wsc the rope is more commonly referred to as 7x19. The rope is very popular in diameters from 3mm to 16mm and is used on a variety of applications. 6x19 FC and 6x19 WSC (7x19) is very flexible in diameters 3mm to 6mm and is used for many requirements where wire ropes are running over pulleys. 7x19 construction is readily available in both galvanised and marine grade stainless steel.

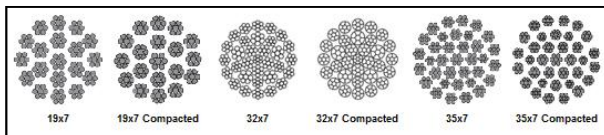

- Balustrades
- Standing Rigging
- Mast Stays
- Guardrails
- Structural
- Stay Wires
- Marine/Saltwater Environment
- Sewage Treatment Works

6 x 36 Galvanised

6x36 is a flexible general engineering wire rope readily available in galvanised, ungalvanised and marine grade stainless steel. The wire rope has an equal lay construction and achieves a superior breaking load to the 6x19 construction range. The construction has been designed to give a flexible rope with a good fatigue life. A 6x36 wire rope is available with either FC (fibre core) or IWRC (independent wire rope core) and is used for a wide range of applications, examples of which are shown below:

- Wire Rope Slings
- General Engineering Applications
- Crane Ropes
- Winch Rope
- Tow Ropes
- Mooring Ropes
- Lifeboat Falls
- Pursing Wires

Anti-Rotational Wires

Spencer Rigging supply a large range of non-rotating wire ropes in both galvanised and ungalvanised finish. Depending upon your requirement for higher breaking load or better wear characteristics, these wire ropes are available in different finishes and lubrications as well as being available with plastic impregnated.

- Crane Rope
- Main Hoist Rope
- Whip Hoist Rope
- Pillar Crane Rope
- Deck Crane Rope
- Offshore Crane Rope
